

More control over every order.

EmporOX brings ordering, fulfilment and invoicing into one system. Your customers order at their agreed prices, your team approves, and dispatch and invoicing carry on from the same record.

Your management screen

Every order for the day, its delivery status and whether it has reached your accounts.

A simple ordering screen for customers

Works the same way on a phone, a tablet and a computer.

Ordering

- Prices visible only to approved customers
- Each customer sees their own agreed price
- Sell by unit, bag, kg or box
- Bulk price upload, preview before applying

Operations

- Today's orders on one live workboard
- Close the day when you are ready
- Truck assignment and dispatch in one place
- Delivery day and stage shown to customers

Accounts

In step with your accounts. Every order you approve becomes a draft invoice in Xero; on MYOB, an import file and a check summary come out ready. Invoices carry your details and ABN, and your books stay where they are.

Your system, your rules

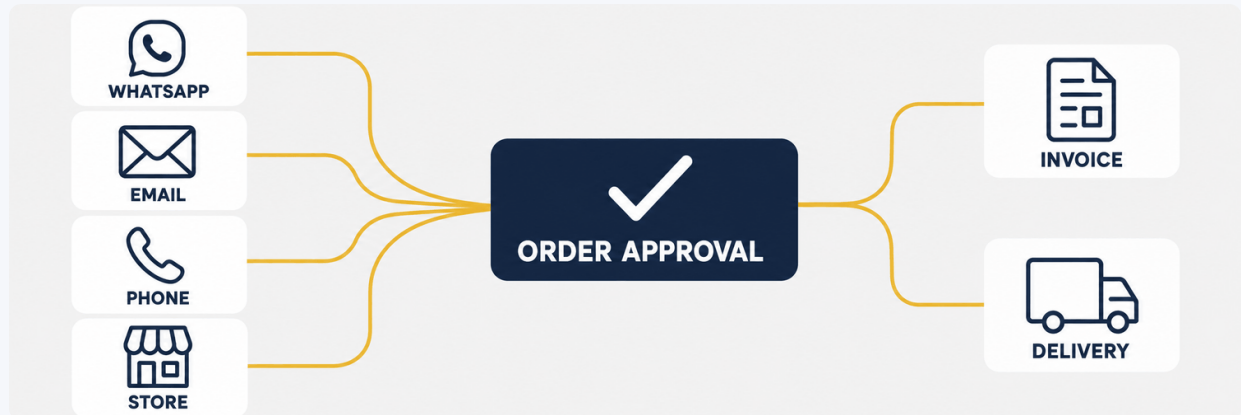

- Customer list, prices and margins stay yours
- Your brand, never a marketplace
- Every change is logged
- You control staff logins and permissions

Add-on modules

Start with what you need today; we add the rest as the business grows.

However an order comes in, your team sees it in one place

Turn messages into ready-to-check orders

An order sent by WhatsApp, email or PDF becomes a draft; your team approves it.

Catch loading mistakes before the truck leaves

What goes on the truck is checked against the order by barcode or photo.

See what is happening across the business

Sales, purchasing, price movement and customer activity come together on one dashboard.

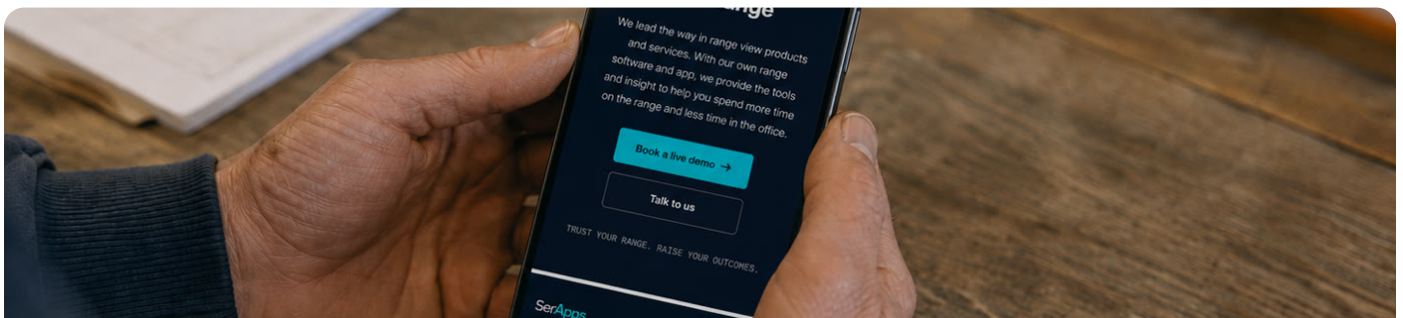

Spot customers before you lose them

Your order history shows what a customer stopped buying and which accounts are going quiet.

Help new customers find you

Priced separately. Be found when buyers ask an AI assistant for suppliers.

See EmporOX with your own products: **free**

Send us 10 products from your catalogue. We will load them into EmporOX and walk you through the system with your own products, prices and ordering process.
